Efficiency Support Program

Customer services to maintain...

Build a strong barrier between your investment and obsolescent technology

Take advantage of the new ESP program. What is your primary need?

Higher line performance	recommended	recommended	recommended
Line reliability	recommended		recommended
Safety and product quality	recommended		recommended
Optimization of new products	recommended	recommended	
Sustainability	recommended	recommended	

Getting the most out of your installed filling and packaging technologies is crucial for the best return of investment and for the profitability of your business. GEA Procomac

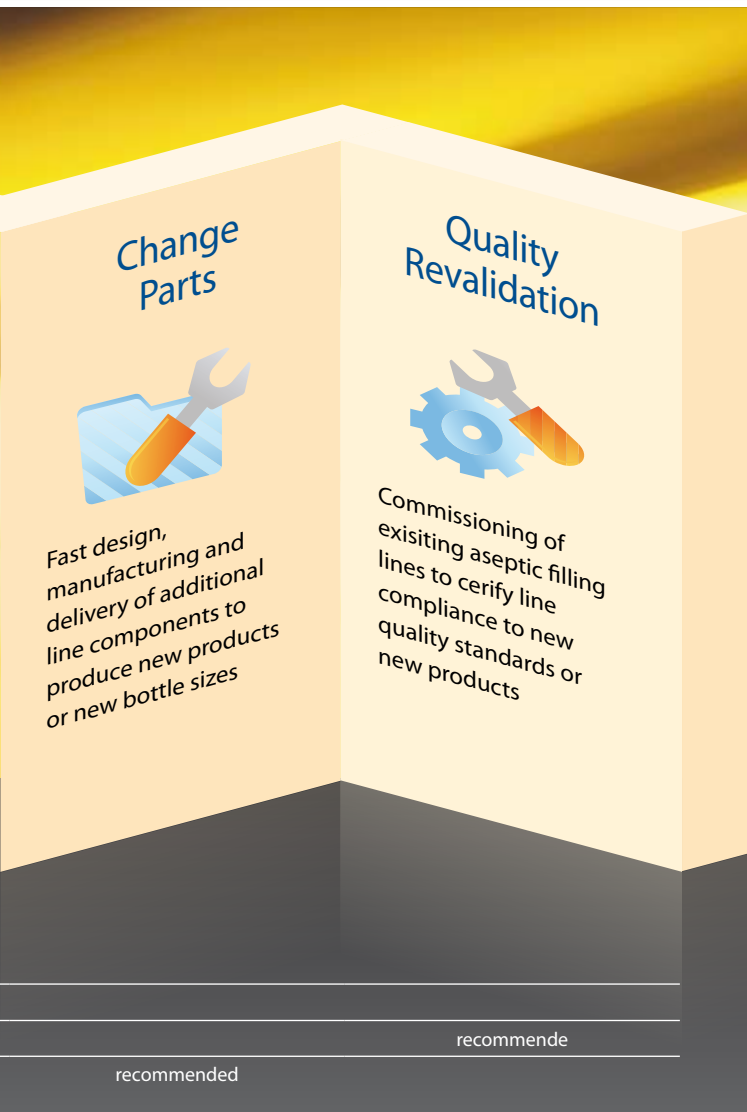

designs their systems as a technological platform that can evolve by integrating new devices on the existing hardware.

GEA Procomac Efficiency Support Program (ESP) is a pro-active service that goes beyond the mere supply of spare parts: a team of specialized technicians helps you identify weak spots in your production facility and can help you improve the overall efficiency: hardware and software modifications, installation of new devices, scheduled maintenance contracts, quality revalidation.

Efficiency Support Program

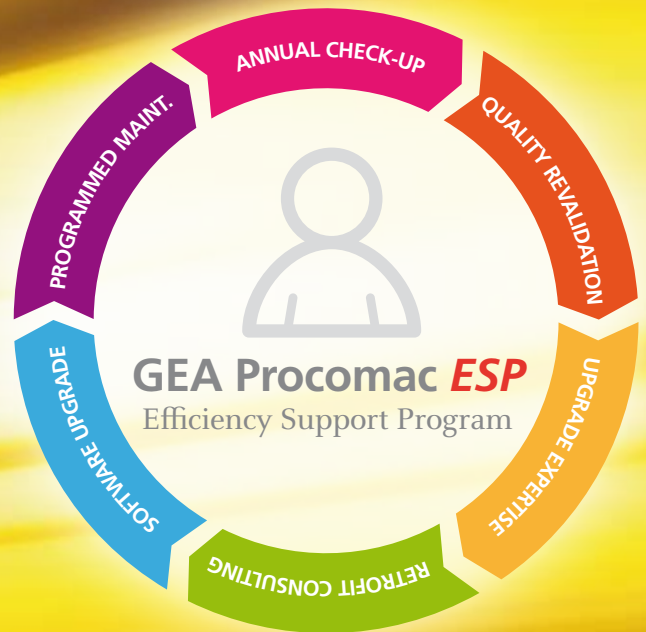

... and improve efficiency over time

Change Parts
Fast design, manufacturing and delivery of additional line components to produce new products or new bottle sizes

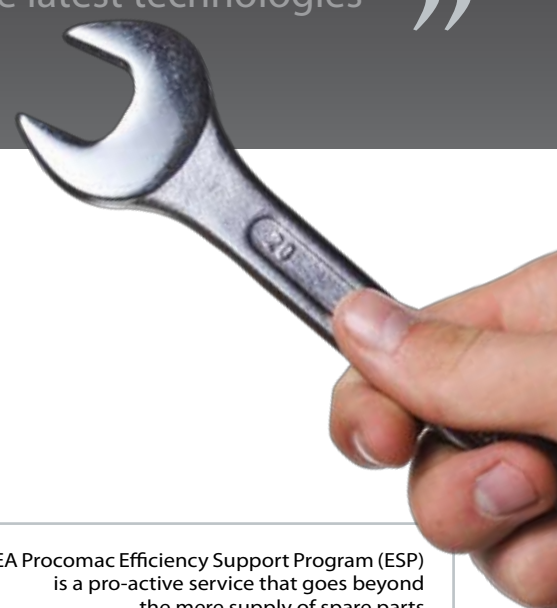

Quality Revalidation
Commissioning of existing aseptic filling lines to certify line compliance to new quality standards or new products

recommended

“Obtain the best results from your installed line. Optimize your investment by upgrading your line to the latest technologies”

www.procomac.it/ESP is your access door to GEA Procomac Efficiency Support Program. You can contact us for a free evaluation of your line or you can browse the available upgrade packages. Being part of GEA Group, GEA Procomac is now in a position to integrate the wide range of processing technologies available within GEA Process Engineering companies.

GEA Procomac Efficiency Support Program (ESP) is a pro-active service that goes beyond the mere supply of spare parts
